EDUCATION

Cornell University, College of Engineering

Ithaca, NY

B.S in Computer Science, Minor in Data Science

Expected May 2027

GPA: 3.63

Coursework: Systems Programming, Machine Learning, Functional Programming Algorithms, Foundations of AI, Discrete Math, Statistics and Probability, Object Oriented Programming and Data Structures

EXPERIENCE

Capital One

McLean, VA

Software Engineering Intern

Jun 2025 – Aug 2025

- Built backend monitoring system with modular plugin architecture for café kiosk platform serving **30+** locations, increasing system uptime and reducing manual support tickets
- Reduced kiosk recovery time by **60%** (5 → 2 minutes) by developing **12+** TypeScript plugins that automatically detect and restart failed hardware components
- Designed high-throughput REST API and optimized DynamoDB schema processing **60,000+** daily health checks and **6 million+** cashier check transactions, enabling **10+** support engineers to reduce incident response time

Cornell Bowers CIS ASCEND Program

Ithaca, NY

LinkedIn Fellow

Jan 2025 – Apr 2025

- 1 of 28 students (**14%** acceptance rate) from **200+** applicants chosen for LinkedIn-sponsored leadership program
- Led product design in team of 5 for AI-powered productivity tool by creating prototype for final presentation

LEADERSHIP

Tech Lead | Cornell Hack4Impact

Aug 2025 – Present

- Leading a team of 5 developers to build a member archive platform connecting **200+** alumni, overseeing sprint planning, code reviews, and technical mentorship
- Improved onboarding processes for **100+** applicants each semester, contributing to stronger recruiting outcomes

Outreach Chair | Cornell Society of Hispanic Professional Engineers

Aug 2025 – Present

- Building partnerships with campus organizations and coordinating collaborative events (e.g., Women's History Month workshop, Common App webinar) to increase member engagement and campus visibility

PROJECTS

Olympic Data Analysis | Python, Pandas, NumPy, Matplotlib

Mar 2025 – May 2025

- Analyzed 120 years of Olympic data (**250,000+** records) using linear regression to identify countries over/underperforming in gold medal conversion rates
- Implemented Monte Carlo simulation to benchmark actual vs. expected medal diversity, revealing statistical significance in 9 out of 20 analyzed events

Ithaca Recovery | TypeScript, React, MongoDB, Microsoft SSO

Feb 2025 – May 2025

- Built responsive calendar interface and integrated Zoom API for scheduling recurring meetings for addiction recovery center, seamlessly managing **200+** monthly appointments

Obligo | Website | React, NodeJS, Express, JavaScript, MongoDB

Jun 2024 – Aug 2024

- Developed a web app to manage chores, with features like family creation, role management, and task delegation
- Streamlined onboarding for **6** pilot families by refining UI, eliminating first-time setup friction
- Architected a Redux global-state layer and **20+** REST endpoints that sync task status across devices in real time
- Secured user data with JWT auth, bcrypt hashing, and role-based access to isolate tasks by family and user

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Ocaml, SQL, C++, HTML/CSS

Frameworks: ReactJS, NodeJS, NextJS, Prisma, Flask, FastAPI, JUnit

Libraries/Developer Tools: Jenkins, Pandas, NumPy, Postman, Git, Docker, Tableau, DynamoDB, MongoDB, AWS
